CYCLO

calling all Hub Gear users

6 or 9 speed CYCLO conversion

Now, the new double or triple fixed sprocket block, complete with Cyclo Gear for cycle or tandem, converts your existing 3-speed hub to a 6 or 9-speed gear.

Special features :—No alteration to the wheel or spindle. The triple version is so arranged whereby chainline is obtained on the middle gear as soon as the specially designed sprocket block is fitted on the existing hub freewheel body.

The remainder of the gear is fitted in the usual way with chain stay bracket fittings to customer's choice. Can also be fitted with either top tube or twist grip control. The only modification required is the adding of 4 links to the existing chain.

SIX-SPEED HUB GEAR CONVERSION SETS

Cyclo Gear incorporating double unit sprocket block in the following sizes :—
Top Gear Sprocket : 13 to 15 th inclusive.
Bottom Gear Sprocket : 17 to 22 th inclusive.

Price (top tube control) 32/6
Tandem 5/- extra.

This adaptation was received with delight and adjudged a long felt necessity for hub gear users by a vast number of visitors to the Earl's Court Show. Order through your local Cyclo Agent or, if in any difficulty, please write to us.
