ERNIE CLEMENTS
says -

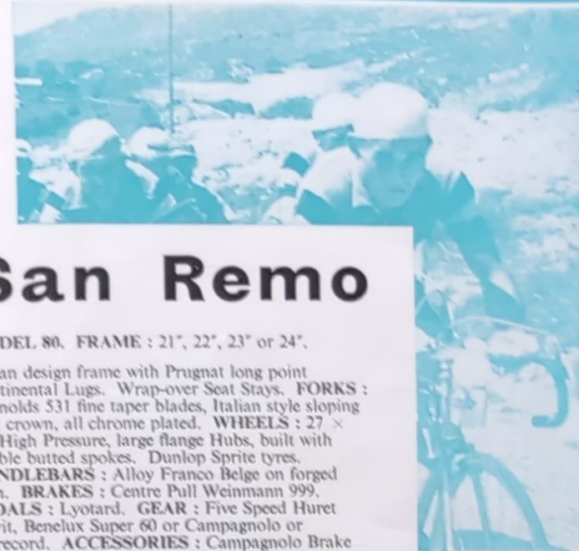

The *Falcon* produced by champions for the Champion. High grade specialised cycles

The Falcon machines in this list embody experience gained both from my racing career and, more recently, whilst managing Continental events. In our factory we are able, by modern production methods, to keep prices low and these cycles represent the finest value in club and racing machines available today.

You will find illustrated various component parts which are standard to some of our models, or which can be supplied as an extra on any machine; should you have any special desire for me to include components which are not illustrated, do not hesitate to write me and I will quote you for any model with equipment which is more suitable for your own needs.

The complete range endeavours to satisfy the needs of all the cycling fraternity — from the young boy who is about to commence his cycling career to the experienced rider, who will find in the 'San Remo Equipe' everything he may desire: this model is a replica of that used by our famous racing team.

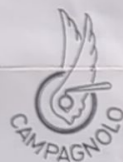

Finally, I've put all I know into the Falcon, it's the 'tops.' But help me to keep it there. I shall welcome your suggestions at any time.

San Remo
